Power cuts interrupt children's exam preparations, plunge homes into darkness, deprive people of the work - from - home option, disrupt favourite TV programmes, cricket matches and cause families a lot of discomfort.

Introducing new APC 850 VA Home-UPS, the most reliable way to beat power cuts

Designed specifically for harsh Indian power conditions, the new BI850SINE-IN provides pure sine wave backup power for home electronics like television sets, home theater systems, stereo sets, gaming equipments, as well for lights and fans, so you can enjoy your life, uninterrupted. This continuous supply of power, which lasts from six to eight hours, is enabled by best-in-class battery and cutting edge technology.

Finally a great solution for power cut problems and a way to boost your business profitability.
